

Points of Distribution (POD)

- The critical planning factor for ordering commodities is “distribution” capability, not people without power.
- Distribution planning must be a priority with local governments for the commodities mission to be successful.
- All levels of government must understand the distribution point concept.
- A distribution point (DP) with one supply lane can serve 1,660 cars or 5000 people in one day, (Type III Distribution Point).
- A Type II Distribution Point has two lanes
- A Type I Distribution Point has four lanes

## Part II Identify locations

### Saline County Locations
