Marshall Municipal Utilities Earns Safety Award

MMU has earned the MWEA Large Collection System Safety Award

April 9, 2019: Marshall - Marshall Municipal Utilities (MMU) has earned the Missouri Water Environment Association's Large Collection System Safety Award for 2018. The award was presented on April 1 during the Association's Annual Meeting held in Osage Beach, Missouri.

Large wastewater collection systems are defined as those having 11 or more employees. MWEA presents the Large Collection System Safety Award to the organization with the best safety record after reviewing safety, accident, and injury data submitted by each applicant.

"This is an important accomplishment and I want to congratulate all of our Underground Facilities team members," said MMU General Manager Jeff Bergstrom. "Providing reliable utility services means working in and around many hazards so safety must always be our top priority."
